

SENIOR FULL-STACK WEB DEVELOPER / UKRAINE / EET-EEST

Kostiantyn Tytarenko

I build and ship **TypeScript web products**, API-connected interfaces, transactional flows, and CMS platforms. My work spans React, Vue, Node.js, and WordPress as a headless CMS for Ukrainian and international teams.

EXPERTISE

Working stack

Technologies used across product interfaces, service integration, CMS delivery, and release workflows.

CORE	FRONTEND
TypeScript / JavaScript / React / Vue / Node.js	Next.js / Nuxt / SCSS / Design systems / Accessibility / Core Web Vitals
BACKEND AND DATA	CMS AND DELIVERY
Express / Fastify / NestJS / REST / GraphQL / PostgreSQL / MongoDB / Prisma / Supabase	WordPress REST API / OAuth / JWT / Jest / Vitest / Playwright / Docker / GitHub Actions

SELECTED WORK

Work with context

Representative delivery areas across frontend, backend, and CMS work.

- 01

Fundraising and donation systems

Built CMS-driven experiences for fundraising teams using WordPress as a headless CMS through its REST API, with reusable content models, donation and payment flows, responsive transaction interfaces, and external service integrations.

WORDPRESS REST API TYPESCRIPT REST APIS PAYMENTS

[CBM](#) / [AGA](#) / [Menschen für Menschen](#) / [UN Women](#)
- 02

Product interfaces and connected workflows

Delivered React and Vue interfaces across product, wallet, raffle, booking, and e-commerce use cases. Coordinated API contracts, authentication states, edge cases, and responsive behavior through production release.

REACT VUE NUXT AUTH REST

[Freii App](#) / [Raffall](#) / [ZenzaWallet](#)
- 03

Editorial, campaign, and brand platforms

Shipped content-heavy platforms with reusable frontend architecture and editor-friendly CMS sections. Focused on Core Web Vitals, accessibility checks, cross-browser QA, and reliable content delivery across devices.

VUE HEADLESS WORDPRESS SCSS ACCESSIBILITY PERFORMANCE

[Strabag Progress](#) / [Topos Magazine](#) / [Meersburg Therme](#)
- 04

Payment and webhook processing API

Built a Node.js and Fastify service for donation and payment workflows. Implemented JSON Schema validation, authenticated endpoints, idempotent webhook processing, structured error handling, and transaction state persistence in PostgreSQL.

NODE.JS FASTIFY POSTGRESQL WEBHOOKS REST APIS
- 05

Headless CMS integration API

Built a Fastify API layer between the WordPress REST API and React and Vue clients. Normalized content from multiple endpoints, added caching and access control, and exposed stable response contracts independent of the CMS data structure.

NODE.JS FASTIFY WORDPRESS REST API REACT VUE
- 06

Authentication and integration service

Built a modular NestJS service for user authentication and third-party integrations. Implemented JWT access and refresh flows, role-based authorization, validated DTOs, PostgreSQL persistence, and documented REST endpoints for frontend teams.

NODE.JS NESTJS POSTGRESQL JWT REST APIS
- 07

Additional recent launches

Additional production work across fundraising, commerce, editorial, corporate, property, and campaign platforms.

EXPERIENCE

What I shipped

Ten years across product work, client delivery, and long-lived web platforms.

- 2021 - 2026

The Cookie Labs

 - Shipped 30+ production launches for German and international clients across donation shops, campaign platforms, e-commerce flows, websites, and product experiences.
 - Used WordPress as a headless CMS and content API, building editable content models and React, Vue, and Nuxt interfaces for content and transaction-heavy products.
 - Connected frontend and CMS flows to REST services, authentication touchpoints, OAuth/JWT contracts, and payment and donation providers.
 - Improved release quality through reusable components, Core Web Vitals work, accessibility checks, responsive QA, code review, and CI/CD handoff.
- 2019 - 2021

DMD Binary

 - Delivered features for five live platforms across raffle, wallet, e-commerce, booking, and medical interfaces using JavaScript, React, and Vue.
 - Refactored fragile UI areas, normalized external API data, handled edge states, and resolved cross-browser issues in mixed legacy and modern codebases.
 - Worked with backend service boundaries on request formats, authentication states, REST endpoints, and maintainable component contracts.
- 2016 - 2019

Agency web development

 - Worked with BoostSolutions, JetBrains, and Fleek Marketing on WordPress-backed platforms and decoupled frontend delivery for UK and Ukrainian clients.
 - Built decoupled frontends, reusable content models, responsive layouts, SCSS components, and admin-friendly CMS structures backed by the WordPress REST API.
 - Supported production releases through cross-browser testing, responsive QA, CMS fixes, and client content workflows.
- 2011 - 2017

NKMZ

 - Managed people, production schedules, quality expectations, and process discipline in metal structures manufacturing before moving fully into software development.
