RECRUITER SNAPSHOT

Full-Stack Web Developer with **10+ years of commercial web experience** delivering JavaScript, TypeScript, Node.js, React, Vue, and WordPress/CMS-based products. I have shipped **50+ websites, product interfaces, donation shops, e-commerce flows, and campaign platforms** for German and international clients. Strong in frontend architecture, API integrations, CMS-driven systems, responsive QA, Core Web Vitals, and turning unclear business requirements into **production-ready, maintainable releases**.

- **Modern JS + CMS range:** React, Vue, Nuxt, TypeScript, Node.js, WordPress, REST/GraphQL APIs, custom themes, editable content modules, and API-connected frontend experiences.
- **Recent proof:** 30+ production launches at The Cookie Labs across donation shops, branded campaign platforms, e-commerce flows, CMS-driven websites, and product experiences.
- **Hiring-manager value:** I can build modern JS products and also ship serious WordPress/CMS platforms end to end without losing performance, accessibility, or release discipline.

IT EXPERIENCE

THE COOKIE LABS

2021 – 2026

SENIOR FULL-STACK WEB DEVELOPER | REACT / VUE / WORDPRESS

- **Shipped 30+ production launches for German and international brands** across live websites, donation shops, campaign platforms, and product experiences using Vue, React, Nuxt, TypeScript, Node.js-adjacent API integrations, SCSS, WordPress, and REST API-driven interfaces.
- **Built CMS-driven products for content, fundraising, donation, and e-commerce teams** by developing custom WordPress themes, reusable content modules, responsive templates, editable CMS sections, and API-connected frontend experiences.
- **Connected business-critical frontend and CMS flows to backend services** by integrating REST APIs, authentication touchpoints, OAuth/JWT-based contracts, payment/donation services, and campaign platform data.
- **Raised release quality for content-heavy and transaction-oriented products** through Core Web Vitals work, accessibility checks, responsive QA, reusable components, code review, CI/CD handoff, and maintainable frontend architecture.
